

Luke Curran
Portland
LD 2091

Hello, my name is Luke Curran and I live in Portland, Maine. I would like to provide my enthusiastic support for LD 2091. We as a society must reduce our dependence on single use plastics and packaging in general. Businesses like GoGoRefill in Portland allow me to procure all of my household cleaning supplies without the upfront and long term costs of packaging. The long term cost is the trash that we've seen washed up all over our Maine beaches in the last few weeks. Our state should lead the country to a better future by minimizing packaging waste at all levels our economy, especially food.
