

Peter Irving
Northfield
LD 780

I am a 76 year old father, grandfather, husband and a retired Vietnam War veteran. I absolutely support LD 780. Suffice it to say I do not want my daughters and granddaughters living in a country where someone other than they have any authority over their bodily autonomy. I didn't fight for this country in order to have half the population reduced to political pawns. I am deeply disturbed by the actions of our federal judiciary and various state governments following the overturn of Roe v Wade. Actions have real consequences and those associated with the horrors of a woman's lack of decision making in their own health care are horrifying. Please make sure LD 780 moves forward.
