LD 2087

I support LD 2087 “An Act to Protect Property Owners by Preventing the Use of Eminent Domain to Build Transmission Lines Under the Northern Maine Renewable Energy Development Program”, and it “ought to pass”.

As I understand this bill, it prohibits the use of eminent domain in the development or construction of a generation connection line or transmission line under the Northern Maine Renewable Energy Development Program.

As a Maine property owner, I do not want my property seized to support this green agenda initiative or, for any reason for that matter. Find some other way to support this agenda.

Again, I support LD 2087 “An Act to Protect Property Owners by Preventing the Use of Eminent Domain to Build Transmission Lines Under the Northern Maine Renewable Energy Development Program”, and it “ought to pass”.
