In regards to LD 780

Please take the time to consider the implications of changing our states constitution. This change would align our state with some detrimental circumstances. We have been a safe state and treasure life. When life is not treasured as a gift from heaven, we have then stepped into an arena where we allow for judgement from the Creator himself to visit our state economically and environmentally. We are not the same state we used to be and are experiencing some pretty major events that have violated our economic state here in Maine.

Please again remember that this not something to be taken lightly. There are people in this state who have voiced their concerns and you being voted into your position are supposed to be for the majority not the minority. Thank you again for taking the time to here my concern for our state.
