

Kristina Shula
Belfast
LD 2091

Good morning Senator Ingwersen, Representative Pluecker, and members of the Agriculture, Conservation, and Forestry Committee.

As a member of the Plastic Pollution Solutions team in Belfast, Maine, I am in total support of LD 2091. Plastic is the new COAL, and microplastics have been found to kill marine life, birds, and now is found in human placentas.

We need a reusable system, and I support this bill wholeheartedly.
