LD 2087

Please support LD 2087 or modify the language appropriately to prevent power companies and their associates from unfairly stealing my land through eminent domain. If the Gateway project goes through and is anywhere on or near my property (in sight) then my property value will plummet by 40 to 60% (proven through experience in other states). I will not sell any partial easement or right of way to the power company or their associates however I will sell my entire property only at fair market value. I choose to not be anywhere near these dangerous high voltage transmission lines. If eminent domain is used, I will not allow the power company or its associates to step foot on my property and I will file suit against the State of Maine.
