Hello, my name is Jordan Smith and I just have a couple of things to say regarding this bill. I'm certain many have brought up the same issues so I will be brief. I support this emergency legislation removing the requirement that every serving of a cannabis edible should not be required to be marked separately. Several items are simply not going to be something this is physically possible with. Beverages, ice cream, peanut butter, infused oils, tinctures, chips, popcorn, the list goes on would be impossible to mark. If the outer container is marked and is child resistant that should negate the need to have each serving individually marked. This really come down to adults being responsible and keeping the product out of reach. There are several potentially deadly items in any home and your gummies are not one of them. We need sensible rules not over regulation.
