LD 2106

I urge you to vote no to LD 2106 - An Act to Accelerate the Production of Affordable Housing and Strengthen the Historic Property Rehabilitation Tax Credit

We wouldn't have a housing problem if it were not for all of the state regulations and meddling. The state takes money from one group to give it to another, thereby controlling both. On top of that, we are aiding and abetting ILLEGAL immigrants by providing them with free housing. You are spending OUR money to fix a problem YOU caused. It would be far better to reduce the number of regulations and invest in airfare to deport those who broke our laws to get here.

Also, we have very little actual historic property in Maine. Our homes were never built to last hundreds of years as they are in Europe. This is just another giveaway to a favored class of people.
