LD 2077 Ought not to pass.

It is inappropriate to limit expansion of natural gas use in Maine. Natural gas is an affordable, versatile, and relatively clean source of energy. Natural gas appliances require much less maintenance and cleaning compared with other fuels.

Mainers deserve choice in what they use to heat their homes, make hot water, run their ovens and clothes dryers, as well as business needs. When winter storms take out other energy sources, natural gas appliance can reliably keep Mainers comfortable and safe.
