

Roger Gutner
Board Member, MLRA
LD 2141

Dear members of the Inland Fisheries & Wildlife Committee,
I am expressing my support for LD2141 which will provide necessary assistance to reduce the spread of invasive species in Maine's lakes. This issue affects all fish, animals & people who use our lakes. We at Mousam Lake have been newly confronted by this contagion, & have done as much as possible to curtail its spread over the past several months. The expense will be enormous, & may be the chief reason why we may not be able control it. We look to you to give us the resources to combat this issue. Please support LD2141. Thank you.
