Dear Legislators, As a retired State retiree my husband and I are struggling to get by on our pensions. We never expected our medical costs to be so high at this age and it's a huge burden. This new less restrictive limit is crucial for us.

By rolling back the MSP that was previously passed, the Governor is harming many of us.

Please override the Governor's proposal under Part NN of the Supplemental Budget and require the State to implement the new income eligibility levels which per recent law were to start March 1, 2024.

Thank you.
