LD 2119

Good morning. I am testifying in support of LD 2119. My husband, a former hunter, used a gun to commit suicide, in 2013. I am not sure that the voluntary waiver of firearm rights allows for someone who is already in a mental health crisis. In common phrasing, he/she can't voluntarily waiver their firearm rights if he/she is not in their right mind. I am also testifying on LD 2086 (apparently, I can't check both on this online testimony form). Please do look at assault weapons that are only used as weapons of mass destruction. My husband would have been the first to tell you, that hunting and assault weapons, are not the same. He understood the nuances of firearm rights. Thank you.
