

Doris Meehan
Windham
LD 227

LD227 is, by far, the most extreme, dangerous, and appalling piece of Legislation that I have ever seen or heard of in my rather lengthy lifetime! How convenient for those who agree with this bill that you would have the public hearing on a day when people all over the state are making time to vote in a primary election! Also, it is clever that the bill was publicized only a few days before the public hearing is to be held. All of that aside, this bill presumes to put Maine as a Sanctuary state whose permissive laws will overshadow and be held above the laws of all other states. It makes Maine a place where the most extreme policies regarding what the bill describes as "health" care but which truly is death to even full term unborn babies, physical and psychological harm to children who can even be "trafficked" to receive these treatments! This is appalling and I urge any of you with any sense of decency to refuse to allow this bill to pass!
