I strongly support both parts of the proposed legislation. Confiscated weapons should be destroyed to prevent them finding their way back into criminal activity. There is no reason that I can imagine for any citizen to need rapid fire weapons, and they are being used in many of the horrific shootings around the country. I have to believe that in our own case, Lewiston, that the human toll would have been much reduced if this type of weapon had not been available.
Thank you for your consideration.
