LD 227

To the HSIFS committee;

I would like to state my opposition to LD 227. This legislation will be removing parental rights and the religious rights of not just Mainers, but of citizens across the country. Parents have a God-given right over what medical procedures, prescriptions and ideology, etc. are done/given to their children. No governmental agency should be taking over that position or taking away that right. Religious medical professionals should not be forced to go against their beliefs to perform dismembering procedures on children of any age/size. This legislation is an affront to Mainers and citizens on the entire country and Ought Not to Pass. Please vote Ought NOT to Pass.
