LD 2086

This bill is unnecessary and in violation of our constitutional rights. The definition of a machine gun in this bill would make almost any semi automatic weapon illegal. This is wrong. The requirement for firearms to be destroyed is also infringing on our right as taxpayers to recover costs wherever possible. As a retired machinist I restore my our firearms for my collection. The spare parts for this hobby would be difficult to find if this overreaching bill passes. Someone defending themselves should not lose their firearms for defense This bill ought not to pass
