

Lynn Sension
Hermon
LD 227

Senator Bailey, Representative Perry, and members of this committee, I am Lynn Sension, a resident of Hermon, and I am writing to testify vehemently against LD 227, An Act Regarding Health Care in the State. I am in shock that we have come to a time when I must give voice (or pen) to these words: It is wrong for the state to traffic children. To be willing participants in stomping on the rights of good parents. It is also wrong to kill the innocent unborn. It is wrong to mutilate children. Calling these things "healthcare" is a lie. Once done, these things cannot be undone. Not only will this proposed bill cause untold harm in this regard, but it will cross state borders, and potentially destroy families, to do so. All in the name of misused compassion. Compassion is care and support, not death and destruction. We can do better. We MUST do better. In a crisis, be it a crisis pregnancy or a crisis of identity, we need level heads to speak truth and lead, rather than the state-sanctioned way of ruin offered by this bill. Please vote "Aught Not To Pass" on LD 227.
