LD 2086

To the Judiciary Committee;

I would like to state my opposition to LD 2086. If a gun was stolen and used for a crime where murder was not the result, the owner of the gun should not have to jump through extraordinary hoops to get their weapon back and keep it from being destroyed. Slating the gun for destruction is a ridiculous overreach and is unlawfully destroying a law-abiding citizen's property. It is bad enough that it was stolen and a crime committed with it, but to add insult to injury, you don't even want to give it back to the rightful owner? That's unacceptable.

Please vote Ought Not to Pass.
