

Barbara Bourque  
Bridgton  
LD 227

I am testifying in opposition to LD227. As a parent and grandparent, I am appalled that consideration would be given to a bill which eliminates parental rights in all 50 states, allows for state sanctioned kidnapping and creates Maine as a sanctuary state for All abortion and for ALL transgender care of minor children.

It is unthinkable that abortion is considered "healthcare" when it involves killing of innocent human life. There are presently laws on the books in Maine which make it illegal to take the life on an innocent or even guilty human being. It is unconscionable that anyone would consider taking the life of a vulnerable infant in the womb.

It is also unthinkable that parents' rights would be eliminated in decision making regarding transgender care of minor children. It's a misnomer to consider sex change procedures "healthcare" especially during the time when bodies of minors are still developing.

Please do the right thing and kill this horrible bill! Listen to your people that you have been elected to represent.
