LD 2224

I am writing to support LD 2224. I have not had the experience of losing someone I love/care about by gun violence. However, I still fear a gun tragedy because of the epidemic of gun violence.

I'm sure you all experience the frustration of not being able to prevent these mass murders that occur all around our country and now in our own state.

I urge you to support this bill as well as other bills designed to prevent such future attacks. We can not turn our eyes away from these horrible killings due to the ease of gun purchases. Over and over we hear that the majority of people want to prevent the sale of these guns that only designed to kill people.

This is the right time to bring some sanity to gun ownership, to stop the killing of so many people who were just at the wrong place at the wrong time.
