I am 100% in opposition of this bill. Parents should have rights when it comes to their own child. A parents job is to guide their child through life- let them do their job! And the people of Maine can't afford to pay for other people's health and medical procedures, and that's what will happen when the individuals coming to Maine don't have medical insurance. It is not the job of Maine to take care of anyone coming from another state!
