LD 2238

I respectfully ask that the committee oppose LD 2238. There is no credible study that shows this will prevent suicide rates. Someone who is determined to end their life will regrettably find a way. As a retired Firefighter I responded to multiple suicides where individuals walk in front of tractor trailers, on the highway, at night. I responded to calls where individuals hung themselves and drowned themselves. I cannot put into words how awfully those calls are. Waiting periods will only effect and possibly endanger the law abiding gun owners of Maine.
