LD 2238

I am writing in opposition of LD 2238. The proposed legislation is yet another infringement on the exercise of a Constitutional right that has no impact other than to inconvenience law abiding citizens. These waiting periods do not stop crime and this would have done nothing to prevent the tragedy in Lewiston. The legislature should be prioritizing increasing access to mental health treatment including areas such as suicide prevention rather performative legislation such as this if harm reduction is the goal.
