Maine people cannot wait! Please pass common sense gun laws to stop the killing and the fear. Waiting periods will prevent many suicides and homicides. Banning weapons of war from our civilian communities is not a violation of the second amendment. The second amendment refers to a well armed militia. If those protesting these bans or limits claim to be protecting there families, what new weapon will they call for...rockets, tanks....ridiculous!

Our children, teachers, healthcare providers, law enforcement...all of us deserve a safer society which means less guns and yes, more mental health services too.
