We need to ban assault rifles, my wife's a school teacher & I work doing reception & security at a city hall. Every day I hear about mass shootings and I'm terrified that this's going to happen again. I worry about my daughter who works at a hospital & my nephews who are studying at university. Where is the next shooting going to happen? When will this madness end? We need the freedom to live with less fear. I'm in favor of hunters hunting with hunting rifles. No one hunts game with an assault rifle. The lives of innocent Americans are worth more than the "fun" a machine gun shooting enthusiast gets from shooting their machine gun at the shooting range. We need to join the the rest of the industrialized, technologically advanced world and ban assault rifles.
