New Gloucester

Testimony of Christopher Bowie

Against LD227

“An Act Regarding Health Care in the State”

Senator Bailey, Representative Perry, members of the committee, my name is Christopher Bowie from New Gloucester and I am submitting this written testimony in strong opposition to LD227. We live in a Constitutional Republic with a representative government that is “Of the People, By the People and For the People.” It was clear on Tuesday the 5th of March that the overwhelming majority of the people that showed up after the clandestine roll-out and subsequent scheduled public hearing regarding this horrible bill were in opposition to it. The shameful part is how in past hearings on similar controversial subjects and hearings, the so-called representatives completely ignored the constituents who came to oppose LD1619 even when the margin of opposition was estimated to be 10 to 1. Hopefully, that will not be the case in this situation, this bill should be killed in committee at the earliest legal opportunity and never again see the light of day. For government officials to propose such a horrendous bill is shameful and on par with the current federal administration as well as the state of Maine woke political agenda.

There are only two kinds of people in this world, saved and unsaved. You are either saved by the blood of Jesus and eternally secure with Him, joining Him in heaven one day, or the opposite is true for those who reject Jesus and His free gift of salvation and that is eternal damnation separated from Him for eternity in hell.

Scripture says “you shall know them by their fruit” or in other words by their deeds, and either you are for Jesus or against Him, no middle ground. This bill is against Jesus and His teaching; therefore, one can only assume that those who proposed this bill are against Jesus and His teaching. I urge you to reconsider and do the right thing and withdraw this bill, if not at least vote “ought not to pass!”
