Defeat LD 2261

Dear Members of the Legislature,

I am submitting this testimony to urge you to defeat LD 2261 and to give this vote to defeat LD 2261 your highest priority.

In 2021 following the non-partisan through the Board of Environmental Protection, you courageously adopted zero emissions standards for cars and trucks. At that time you wrestled with weighing the cost to the environment with the difficulty the people of Maine would have to face. You were a leading legislature and an example for the rest of the nation. I am sure your constituency was cautiously very proud of you but more importantly your families and especially your children gave thanks for your looking to save theirs and my future.

Please keep our faith in making the difficult decisions that we must face in addressing climate change. We must not renege on our promise just because climate change decision come hard. Let Maine remain a leader and a mentor for the future by making the difficult decisions now.
