Chair and committee members:

I am writing to you to vote "OUGHT NOT TO PASS" on this very upsetting bill. I have seen many bills come before the legislature that are undefined and without any description of what they are for, but this is a really scary one. This seems to indicate that our legislature is giving carte blanche to the government departments to spend all they want to spend and they will pay the tab. It would seem that no department is going to be accountable to staying within the budget they were given money for. If I ran my business or household that way the government wouldn't swoop in and cover my over expenditures, they would tell me too bad, pay up. There are no ramifications of not following your budget if you get more money when you over spend! That's the trouble with lifetime bureaucrats, they don't know how to run a business. You are bankrupting our government and our citizens with "Hail Mary" passes that let you continue your incompetence to run a lemonade stand.

Again, I urge you to tighten your belts and do as you said by staying in your budget with no more money from us. Please vote OUGHT NOT TO PASS>

Thank you

PS If this isn't what it seems to be in the limited write up it had and I am completely off this subject, don't blame me. It is because you purposely write bills like this one so that we won't know what it says and will ignore it. You need to be more forthright in your bills and write what they really are. This dishonest way is very wrong. What are you afraid of, the Truth?!?
