How do you decide if someone is not mentally fit to own a gun? Do you deprive them of due process? Do you have a certified psychologist evaluate them? Or do you just take the word of someone? Do we want funding neighbors filing a red flag complaint and have their feuding neighbors gun rights violated over a spat?

The Maine constitution literally has the words "shall not be questioned". How will you guarantee our rights are protected? Please leave the law alone and uphold the Maine constitution.
