

Geoff Gratwick  
Bangor  
LD 2283

As a physician and former legislator, I strongly urge you to pass LD 2283. It will allow family and close friends who know the troubled individual best to act expeditiously. Medical and psychiatric interventions take time if they are to be done well and can follow. Careful legal safeguards are built into the procedures outlined in this bill. I have had personal experience with firearm death; it continues to haunt me. Please pass LD 2283.
