LD 2283

Good morning ladies and gentlemen,

As a citizen of the State of Maine I feel I should speak out against LD2283 as it will put more people i danger then will actually help. We have seen numerous situations across the country when these laws have been used and where innocent people get caught in the middle. Not only is it dangerous it is also violating a persons rights where a person is innocent until proven guilty. If a person needs help then instead of removing firearms we should help the person an take them to get the help they need. If a person is going to either harm themselves or others they will find away . You are setting a dangerous precedent if this law is enacted so I implore you not to pass this legislation and consider funding more mental health programs and facilities.
