

Jenna Wozer  
Kennebunkport  
LD 2283

I am a resident physician in psychiatry in Maine and am deeply concerned about the current gun legislation in our state. I am strongly in support of LD 2283. I work with suicidal patients on a daily basis and ask about access to guns as part of each crisis assessment, but have no current ability to restrict suicidal patients access to guns during this incredibly vulnerable time in their life. Please help the individuals and families seeking crisis resources in our state by passing LD 2283. LD2283 would enable us to do our job of enacting safety plans with our most vulnerable patients.
