

Scott Ledoux
Eastern slopes airport
LD 138

I have had wildlife encounters flying in and out of multiple airports. A few very close encounters that subjected both the wildlife around the airport and my family aboard the aircraft in danger. There is a vast amount of area and resources for wildlife to flourish. In or around an airport is not it. It puts humans, aircraft, and wildlife in and around the airport in direct conflict, and at significant risk of injury or death.
