

Thomas Rebmann
Fryeburg
LD 138

I am a retired member of the Fryeburg planning board and the Fryeburg Water District and former chair of the Hiram Planning board and the Hiram Comprehensive plan committee. I have spent many years in consideration of balancing the relative importance of the public good, private property rights and environmental regulations. Environmental regulations are instituted for the benefit of all species living in Maine and should not be abridged for the benefit for any special interests. I strongly urge "An Act to Exempt Airports from Certain State Endangered and Threatened Species Habitat Protections" be rejected. Thank you for your time.
