This bill should be defeated. Airports should not be exempt from these protections and especially without a location based environmental impact study and a cost benefit analysis to the loss of critical habitat? It is the Environmental and Natural Resources Committee's responsibility to uphold these important protections and they need to hear from communities that might be directly impacted by changing this law.

We have an airport in our town which has already done damage to the environment past what it is supposed to do. And it ignores environmental protections whenever possible. It is horrifying to imagine what it would do with these protections to be loosened. Any legislator who support such a bill is an enemy of the environment and should be exposed as such.
