

Bryan Beaulieu
Brunswick
LD 133

I oppose LD 133. Including barking as part of the nuisance regulation is too vague on what would constitute a nuisance (one bark, two barks, three barks?...). Neighbors could weaponize this regulation at neighbors with dogs that rarely bark and face hefty fines that could potentially force them to sell and move. This is overregulation when it should be handled at the local level or already be covered by town's quiet hours.
