

Theresa Sol
Livermore
LD 113

Dear Representative Michael Soboleski:

I want to apologize and explain for not standing up to speak at the public hearing for LD 113: "An Act to Require Food Labels to Disclose Use of Messenger Ribonucleic Acid Vaccine Material in Food Production"

First, this information was not known to the public or at least to me. This hits home when Corvid hit and the Government forced people to get vaccines that this vaccine had not been tested. My understanding, a vaccine or any medicine for the public has to be tested for at least 10 years. I do believe there are 4 stages and each stage takes years. Then, there is a risk factor involved in which all those people that spoke against this bill did not tell you how many people died from this vaccine nor complications like heart disorders from taking this harmful vaccine. They will never tell you the truth until one of their family members or themselves will get the side effects.

Prior to this vaccine, any vaccine, I do believe the companies have to give you a fact sheet about what it is in this product and harmful side effects. Why isn't this vaccine the same? There are plenty of scientific studies on the harm of this vaccine which is hard to find because the Pharmaceutical companies are hiding it or make it impossible to read. I could go on what they are trying to do to make profits.

Speaking at these meetings is all new to me and the protocol of how these meetings are run, what to say, how to say, documents to prove your side of story.

When we came into the meeting, it was for changing the dog barking nuisance in which we are in favor of. We did not know about this meeting until someone told us. We were never informed.

When we heard what you were presenting, I wanted to stand up for you, but again was not prepared with the evidence.

We have the Right to Know what is in our food, especially this harmful product like this vaccine.

I know at least 10 people who are against this vaccine and did not take the vaccine because of the harmful effects. Now we are forced to eat it?
