Testimony in OPPOSITION to LD 173
An Act to Exempt Certain Watercraft from Registration Requirements
Submitted to Inland Fisheries and Wildlife Committee
February 10, 2025

Good afternoon, Chair Baldacci, Chair Roberts, and Distinguished Members of the Inland Fisheries and Wildlife Committee

My name is William H. MacDonald, and I live in Farmington, Maine, I am a board member of the 30 Mile River Watershed Association, past President and founder of the Kimball Pond Association where I have a summer camp that I helped my father and mother build in 1959.

I urge the committee to maintain existing registration standards and vote no on this bill for the following reasons.

Loss of revenue that supports important lake protection programs at IFW: As you know, boat registration fees are put to good use, paying for vital services from the state. With no clear definition of a “rowboat”, and with the horse power limit set so high, we are concerned that many larger boats could be equipped with oarlocks and consider themselves a “rowboat”, even though they exclusively use a motor. This bill opens the door for many types of boats, perhaps the majority of boats in Maine, to be exempt from registration fees. The Department would not only lose registration fees but also additional revenue from the Coast Guard that comes with every registered boat. The loss of revenue would have a serious impact on the department’s capacity for lake protection work.

Loss of revenue from the Lake and River Protection Sticker program: Even though the registration exemption would still require boat owners to purchase a Lake and River Protection Sticker, in reality there will be little incentive or easy avenue for that to happen. Other boats exempted from registration (races, regattas, and water ski exhibitions) are all part of organized events that have oversight and mechanisms to distribute Lake and River Protection Stickers to participants.

Exempting individual boaters who are not part of an organized group leaves them very likely to skip the purchase of a Sticker, resulting in decreased revenue that funds important invasive species risk reduction work, including Courtesy Boat Inspection programs and invasive removal work. Both efforts are essential to reducing the spread of invasive species. Exempting a group of motorized boaters without assurance for compliance with the Sticker requirement means people whose motors are part of the problem will not have be responsible for helping pay for the solution.
