

Testimonials for LD- 18 and LD-45 are as follows:

(1) LD-18 / the reason for the Doc to increase the medical co pay is said to be so that hospice workers can be paid, when in reality not one hospice worker at the Maine State Prison has asked to be paid. A small increase in the co pay would be understandable as everything has gone up in price, but an increase of five times over to pay a group of residents who simply refuse to be paid is at the very least discrimination and unconstitutional.

(2) LD-45 / the cost of the tablets: (a) we are charged for calls to our families even if our family doesn't answer. (b) Charges of .05 per minute to see what on the tablet. (c) West Law has been taken off the tablet with no replacement. (d) We are forced to use one computer for 800+ residents. (e) Also we are suppose to have access to the law library 7 days a week which is what we had with West Law before we switched from Edevo to GTL. (f) We are going on four months and nothing has changed with residents having no access to legal research.

The above paragraphs are the testimonial as to the facts written by resident Jimmy Lipham.
