LD 228

I urge you to vote OUGHT NOT TO PASS on LD 228; An Act to Allow Seawalls to be raised by up to 2 feet in order to accommodate predicted sea level rise. According to the Intergovernmental Panel on Climate Change, IPCC, For the last 140 years, long before cars and carbon fuels were used to a great extent, the Earth has warmed at a rate of 1/8 of an inch per year or .125 inches. This has been consistent for 140 years and means it will take about 10 years to rise an inch. This has not changed even though cars and fossil fuels were not used a lot until about 100-120 years ago. If the fuels made such a difference, why isn't the ocean rising at a faster rate now than 120 years ago. This "scare tactic" by the Global Alarmists is just another way to control the way people live their lives. I'm a great believer in, "if it isn't broken, don't fix it". I believe in being good shepherds of our world, but this is a total waste of our money. The ocean will not be held back by a seawall or anything else. All we can do is go with the flow of what God wants for us. Please vote no on this useless but costly endeavor. VOTE OUGHT NOT TO PASS on LD228.
Thank you!
