I live in Cape Elizabeth. I am highly in favor of the interim trail from Portland to Auburn. I have bicycled the East Coast Greenway from Calais to Portsmouth and beyond and always feel safer on the trails, away from vehicular traffic. I would love a new trail to a new destination. This trail will provide a safe and healthy route for both leisure activities and commuting between communities.

Bicycling is also helpful to economies along the trail. Bicyclists with their slower pace of 8 to 12 miles per hour on trails require frequent stops for water, food and more. Please vote "ought to pass". Thank you.
