I am a resident of Portland and I am writing to voice my support for a traffic-separated, multi-use path from Portland to Auburn. This trail would encourage outdoor recreation and commuting, contributing to the health of our communities and allowing decreased car traffic and carbon emissions. One of the biggest barriers to getting outdoors and travel on foot or bike can be the perceived lack of safe, car-free space. This project would help fix this issue in one of the most densely populated areas of Maine. Please vote "ought to pass".

Thank you for your time and consideration.
