

Eric Sofen
Freeport
LD 29

I live in Freeport, and I urge the Transportation Committee to vote in support of LD 29. An interim trail from Brunswick to Gardiner would improve public health, protect the environment, create recreational opportunities, and provide options for people who don't drive, or simply want to drive less.

The road route along Merrymeeting Bay has been one of my favorite rides, but traffic volume has increased significantly over the years, making it less safe. A trail alternative would be a valuable addition to the region. Please vote "ought to pass."
