Maine Legislature

Re: Support for LD 222: AFFF Take-Back Program

Dear Chairperson Doudera and Members of the Committee,
My name is Regina Snyder and I am a resident of Harpswell. I am writing in strong support of LD 222, which creates a take-back program for AFFF to ensure safe collection, storage, and disposal.

Why This Matters

The contamination caused by these chemicals is an ongoing issue, and the August 2024 spill at Brunswick Landing was a sobering reminder of the dangers posed by AFFF. As you know, 1,450 gallons of AFFF concentrate mixed with 50,000 gallons of water leaked into the environment, contaminating Mere Brook, Harpswell Cove, and the Androscoggin River. This was not just the largest AFFF spill in Maine history—it was the sixth-largest in the nation.

The toxic PFAS chemicals in AFFF are known to persist in the environment indefinitely, posing significant risks to human health, wildlife, and water quality. Studies link PFAS exposure to serious health effects, including cancer, immune system suppression, and developmental issues in children. This threat is especially concerning for communities like mine, which rely on clean ground water for drinking, and clean ocean waters for recreation and livelihoods.

The Solutions Proposed in LD 222

LD 222 takes the measures of its sister bill LD 400 (which I also support) one step further by creating a take-back program to safely collect and store AFFF until a safe disposal method is available. Taking these chemicals into a safe program will help prevent future contamination and protect Maine's waterways.

Why I Support This Legislation

- Protecting Public Health: Mainers deserve to live without fear of cancer-causing chemicals in their ground water and fish.
- Environmental Stewardship: Maine's waterways are central to our way of life. Ensuring they remain clean and healthy is our responsibility which you can help ensure by passing LD 222 and its sister bills LD400 and LD407.
- Proven Alternatives Exist: Other states, including New Hampshire, have adopted safer alternatives and established collection programs. Maine can and should follow their lead.

In conclusion, LD 400, LD 222, and LD 407 are essential steps to safeguarding Maine's environment, protecting public health, and ensuring responsible management of AFFF. I urge you to vote in favor of these bills and take action to prevent further harm from PFAS chemicals.

Thank you for your time and consideration.

Sincerely,

Regina Snyder

Resident of Harpswell who relies on clean ground water
