Casco
LD 646

I am writing in support of LD 646 - Resolve, Establishing the Commission to Study Unregulated Storm Water Pollution. As a year round lakeside resident of Thomas Pond in Casco, I am very concerned about the seemingly lack of oversight or control of storm water drainage. Maine has 6,000 lakes and ponds whose waters provide countless hours of recreation to its residents and visitors, as well as contributing millions of dollars to Maine's economy. I believe that it is imperative that Maine do all it can to protect these precious resources.
