Please act now to protect minors from political violence by protecting their identity with anti-doxing legislation. A minors name and photograph can not be used in public related to juvenile legal matters to protect them from undue public prosecution, the same protections are in order related to political matters. Those who harm minors by utilizing their personal information in a public fashion to promote their own agendas ought to be held responsible. Politcal agendas are able to be argued and promoted without identification of individuals. We all have the responsibility of protecting our youth from public scrutiny especially in today's current mental health crisis. I implore, protect our vulnerable youth with anti-doxing legislation.
