LD 450

I am in favor of LD 450 "An Act to Lower Electricity Costs by Repealing the Laws Governing Net Energy Billing" Our electricity costs are too high in Maine. How can we expect businesses and young people to thrive in our state when we have ridiculously high energy costs! Citizens of Maine should NOT be forced to subsidize experimental energy production like solar panels which are hugely ineffective in northern states due to lack of sunny days and the snow which damages the panels and buries them as well if we have a particularly snowy winter. If solar energy was cost effective, let the private sector invest in this form of energy production. I should not be forced to pay yet another wasteful and ineffective tax!
