

## In Support of LD260 ERA

Secure equality for women in the US Constitution is more important today than ever before. With personal rights being canceled or abrogated by the current administration, women must have their status as equal members of society fully represented. Whether the subject be divorce, property rights, employment or other gender discrimination, women must claim their Equal Rights before the law. The Maine Legislature, which is composed of reasonable and intelligent individuals, must vote to pass LD260 when so many of our legal rights have been called into question.
