Topsham
LD 444

I strongly urge you to vote OUGHT TO PASS on LD44, An Act to lower energy costs by repealing the law setting out the state's goals for consumption of electricity from renewable sources. In a word, it gets rid of all the costly and ridiculous renewable energy laws that have made electricity so expensive in Maine that some people have to choose between eating and heating their homes. These sources like windmills and solar panels are bankrupting our state! And our people! The solar panels have a short life and fill landfills when they are done with plastics and electronic parts. The windmills have low output, level our mountains and hills and kill birds, when they aren't burning up. Not to mention, how ugly they all are and what beautiful land they take away. Land that will grow food, and vegetation that produces oxygen for us to breathe. There is NOTHING good about so called Renewable Energy. Therefore, please repeal the laws setting this lunacy into motion! Please vote OUGHT TO PASS on LD 444 and turn our state green again!! Thank you!
