Given the current political climate, where individual rights are being targeted and the administration seeks to undermine our nation's constitution, it feels more critical than ever that we ensure that equal rights for all are still protected in Maine's constitution. Over 29 states have already done this. It's time for Maine to follow suit and protect everyone's rights. For this reason, I ask the committee to please vote 'ought to pass' in favor of this bill. Thank you.
